

Today, I worked at Srey Santhor district. At there, I worked with 5 sites such as Srey Santhor High School, Wat Prek Po Mungkul, La Peang, Prek Ta Be and Prek Rumdeng.

The result, I got alot of information from many local people surrounding each sites. But the information were not good for forensic team to work at. Each sites were dug up already and now we cannot find some bones and skulls, except one site, La Peang, that have some remains. But this is also have already dug up. But it still in under Daem Po (Po tree). I think that this is the same what I have found at Koh Phal, Trea II and one site in Kampong Thom.

Tomorrow, I will go to Prey Chhor and Chamkar Leu districts for finding pits that have no dig before. After I come back from these two district, I plan to go to Dambe and others.

Today, I worked in Chamkar Leu and Kampong Siem districts. These two districts I already finished working at 4: 25. The information from those sites, I descript below:

Chamkar Leu district:

This district has 8 sites, such as:

1. Andaung Ta Sun and Chamkar Kao Sou Lekh 2 sites

In the year 2001, I got information from this site already. Now, I do with this site again. I spent about 2 hours to work at that site. I talked with two local people. Nget Luch, 55, secretary of Lekh 1 village, Chamkar Andaung commune, told my team that Aundaung Ta Sun was dug up in between 1981 and 1983. The purpose was finding goals. I didn' t go to see this Andaung, but according to Mapping team report in 2001, this Andaung contains 12 meters deep and 1.5 meter square. People in Lekh 1 village have kept this well free since the well was dug up. At Chamkar Kao Sou Lekh 2, Neak Tok,, 62, live in Lekh 1 village, told that he saw 10 pits stand at this site. Among that site, there were two big sites. He know that Khmer Rouge cadres killed many people at those pits. Now, he say that those sites were dug up and cannot find remains.

2. Chamkar Ta Pom site

I saw this site when Sin Khin made interview with many people in Chamkar Ta Pom village. Some planes and houses were built and grown full of this site. Mao Ed, 69, people who live in Chamkar Ta Pom village, said that her house build on the pit. She points me a pit that she keep some materials on it. San Yon, 62, live in Chamkar Ta Pom village, descript that Chamkar Ta Pom was a very large place to kill people. She continued that all pits were dug up.

3. Kuk Mitt Sao, Wat Por Pren, Prey Trapeang Kok Sam and Trapeang Khnar sites

All these sites located in Speu commune and close to each other. I asked many people who work at Wat Por Pren. Those people told me that Wat Por Pren and Kuk Mitt Sao were used as Khmer Rouge prisons. Prey Trapeang Kok Sam and Trapeang Khnar, Khmer Rouge used as killing sites. These two killing sites were already dug up in 1982 for picking bones and skulls to keep at Memorial in Wat Por Pren. Pann Nha, 61, Chief of Peng Meas Cheung village told that this memorial was used for making ceremony in May 20.

4. Chamkar Svay Channty site

In 2001, surrounding this site, I was too much forests grow on it, but now when I saw it again, it is very different. I cannot remember that site when I arrived at that site. When I asked people nearby this place, they told and pointed to the factory that " this is a killing field place in Chamkar Svay Channty" . However, we cannot find fine pits that no dig before because now everywhere in the factory place has a lot of rubber trees.

5. Lo M 18 site

This site was already dug up for finding foals. The oldest people among many people in a large house named Sim Ly, live in Ta Ong commune, told that many people who live around rubber plantation got goals from the cloths in pits after they dug it.

KAMPONG SIEM DISTRICT

In Kampong Siem district, there are only three sites located on it.

1. Wat Nor Kor site

In June this year, my team and forensic team were worked on it already.

2. Wat Phnom Bros site

Some people said that all mass graves and pits were dug up between 1982 and 1983. The remains were kept at Wat Nor Kor, far about 3 Kilometers from Wat Phnom Pros. No pits that no body dig it.

3. Kok Pring site

I drove about 9 kilometers from the national road number 6A reach the site of Kok Pring. I didn't go to that site because of that site was dug up already. If I went there I need to have a boat and must to walk about 300 meters to reach on the site of Kok Pring.

My report is finished.

Tomorrow, I will go to Prey Chhor and Cheung Prey district.

At the mornign on Thursday, I went to meet Mr. Sarun who work at Department of Culture and Fine Arts of Kampong Cham province to talk about pits that not yet dig by people.

He told me that he doesn't know all but he point our team to work at one site in Batheay district, Tuol Khmaoch Cham. He said that he in not sure that pit has already dig or not yet.

After the discussion, my team went to work at Prey Chhor nd Kang Meas districts. Sin Khin and I think that Batheay district is nearby Phnom Penh, so we keep it to work later when we has target to Kampong Chhnang.

Here is the result in two districts:

PREY CHHOR DISTRICT

I'm sorry that I cannot descript some more detail what I got from the local people, because now is nearly close the E-mail center.

I found all sites that Mapping team has found before white many small

sites which I got it today. Sin Khin and I tried to ask people, village and commune chief about the pits that have not yet dug up. But I got the negative answer from them. The same answer of those people are digging goals.

KANG MEAS DISTRICT

There are two big sites in the list (Wat O Trakuon and Wat Nikrot) that we got before. Now, I found one new site (Wat Prey Krabao) more on it. People who work and stay at the pagodas said that there are not many site beside these three sites at Peam Chikang commune. At other commune, there have wavy roads and cut down by flooding water. I think that we should not go because we spent too much time for travelling.

The result of three site above are:

Wat O Trakuon and Wat Nikrot, have no more pits that people didn't dig. Ta Hao said that all pits and mass graves were dug up twice by the governor of republic and the local people. He added some people that didn't know where pits were stand dug everywhere surrounding his land and near mass graves. Huot Huong described that killing pits that when people dug they got some goal from the ghosts. He believes that there are no pits or grave has not yet digging. However, today Sin Khin and I tried to find and make interview with people.

Tomorrow, I plan to work in Kang Meas again and other districts.

Now, it is time closing the office of Email, so I finish my report and I cannot read my message from you and others. I will read it tomorrow if I have some more free time.

There, I met Buon Kauy, 62, former chief of Front and Information Center. Now, he is retired. He told me that he lead the villagers to pick up remains to keep at two stupas, Wat Phnom Pros and Wat Norkor. He continued to say that he did a list of mass graves were dug up and has not yet been dug up to the office of Kampong Siem district. But when I asked staffs who work at the office, they didn't know everthing. Kauy believe that there are few pits that have not been dug up yet, but he didn't remember where it is. Kauy point me to ask Ta Dan, who work at Phnom Pros pagoda. Dan told like that " no more pits that have not been dug up"

Around that site, I asked 6 villagers more, but the same answer is the pits were already dug up. Channy, 42, live near the Phnom Pros site, was a person who join digging mass graves and pits with many people from everywhere told me like that " I believe that all mass grave and pits were already dug up" .

Beside the Phnom Pros-Phnom Srey sites, I tried to ask some informants such as commune chiefs, village' s chiefs and many villagers about the pits that have not been dug up yet, But the result are the same Phnom Pros-Phnom Srey sites.

Today, I worked at Ponhea Krek district (60 kilometers from the Kampong Cham Provincial town), where we know that has some pits that has not been dug up.

THIS IS THE LIST OF UNDISTURB SITES AT PONHEA KREK DISTRICT:

LA VILLAGE, KAONG KANG COMMUNE,

1. Andaung Ta Vet (behind his house)

This well contains 5-6 meters deep and 1.5 meters square. The most of victims in that well were Sou Phim' s soldiers and no female.

2. Andaung Ta Kham (close to his house)

This well contains 6-7 meters deep and 1.5 meters square. The most of victims in that well were Sou Phim' s soldiers and no female.

3. Andaung Yeay Yat (behind her house)

This well contains 6 meters deep and 1.5 meters square. The most of victims in that well were female (Maybe they were mobile work brigade.

4. Andaung Year Nha (close to his house)

There are two wells close to each others. These wells contain 6-7 meters deep and 1.5 meters square. The most of victims in that well were Sou Phim' s soldiers and no female.

STUNG TAUCH VILLAGE, KAKK COMMUNE,

There are two pits (at least 3 meters square) have not been dug up yet. Kung Ket, 40, live in Stung Tauch village said that he has seen these pits since 1979.

All the undisturbed sites are no problem for forensic team to work at. About the security is no problem because those sites are near the villager's house.

Tomorrow, I will wait for the Angkar's comments and orders which where I go to work. But in my plan is: tomorrow, I will go to work at Batheay and Churng Prey districts.
