No. 9

Weekly report to beloved Angkar M. 560:

Northwest Zone:

I. Situation of both internal enemy and external enemy

1. Situation of internal enemy in region 3 within this week from 12 August 1977 to 22 August 1977: In every district, every cooperative of the whole region 3, there are still the internal enemy. The internal enemy are the enemy who hid themselves in districts, cooperatives, and with ordinary people, and class enemy also. This enemy is still seen to oppose the revolution and collective. Not yet abolished. The incident made by this enemy such as throwing M-79 on the bridge head in the workers' place near the checkpoint in the corner of the street to rice mill in Mongkul Borei District. It damaged nothing, but a tire of military truck. The thrower could not be found. [We] do not remember day, but it was in August. In Batt Trang cooperative, there was a secret attack from behind. On 17 August 1977, while a horse cart worker was blowing fire, he was hit from behind faint. On 16 August 1977, there were 6 people escaping from Russei Kraom cooperative, Mongkul Borei District. These people were soldier elements [Lon Nol soldiers]. We took measure to ambush them, but we do not know where they are now. On 14 August 1977, soldier of region shot a medical staff of anti-malaria team dead in Ta Krey cooperative. We do not know the reason and the shot happened in the evening. We take measure to keep track on the shooter.
2. Furthermore, in every district, every cooperative in region 3, moral offenses are increasing. The moral offenses were committed married men and married women. Women betrayed husbands and husbands betrayed wives to have another partners, but our revolutionary Angkar is reeducating them. They still commit moral offenses. They do not follow the advice of our revolutionary Angkar. They still oppose the clean revolutionary lines. They do not give up [the nature] of corruption regimes. They still oppose [Angkar]. We decided to destroy them. We cannot keep them as they spoil others' wives. So, there is still internal enemy.
3. External enemy situation:

In our region within this week, there is nothing changed. It is like last week, but there are some enemies who escaped from region 4, district 41 and region 1. This week, we arrested 15 enemies. 7 of them were arrested in Ampil district, 4 of them arrested in Phnom Sampeou district, and 4 of them arrested in Bavi district. So, there are altogether 15 enemies.

Therefore, we will try to destroy and abolish both internal and external enemies. Furthermore, this week, on 12 August 1977, for the external enemy, there were 2 plans flying up to Ta Kong village, Kaup cooperative and the planes flew towards Thma Puok district. On 17 August 1977, there was a plane of the enemy flying from the west up to Dangkao Ta Mang, Ampil district and then turned back to the west.

II. Addition to the situation of the internal and external enemy

1. Situation of internal enemy in region 3 within this week from 22 August 1977 to 31 August 1977: In every district, every cooperative of the whole region 3, there are still the internal enemy. On 22 August 1977, there were 8 people making escapes within Mongkul Borei district, 4 people in Talam cooperative, and 4 people in O Prasat cooperative. These escapers were soldier elements [Lon Nol soldiers]. We are seeking for their leaders who initiated the escapes. We arrested 19 other people. 4 of them were arrested at the Waterwheel [Rohatt Tik], 2 of them were arrested Banteay Neang, 1 of them in O Prasat and the rest were the elements who served the enemy tricks against Angkar's lines in cooperatives. 15 people were arrested in Mongkul Borei district, and 4 people arrested in Babil district.
2. The following is the situation along the Mongkul Borei river within this week:
 - Neou Soeur who worked in mobile work brigade said that the upper superiors know only killing and he defamed and sang to insult the socialist revolution that [we] eat only rice with water convolvulus but work with the revolution without having a rest. It was more comfortable in former regime. So, to have a rest he had better to pretend to be sick. Then he sang that Oh, Cambodia is so beautiful, but cows are skinny and people are bony. When he heard the sound of explosion he sang that when thunder hums, it is close to the transplant season.

Furthermore, the destroying activities were also seen such as turning rice stalks and carelessness and lack of responsibility. This referred to pulling out seedlings or transplanting or carrying [seedlings] with no care, and damaging rice stalks. For the people who were transplanting, when they heard sound of firing they smiled and if they did not hear the sound of firing, they look sad. They also wrote anonymous love letters. They pretended to be mad. In conclusion, in districts of region 3 in this August, there are a lot of moral offenses. It happens in all districts. Secretly killing cows for food were also endemic in Boeug Ampil cooperative of Babil district.

The above mentioned were in Mongkul Borei district, Russei cooperative, Chamnao cooperative, Waterwheel, O Prasat, and Banteay Neang Lam.

- Moral offenses occurred in every district, Phnom Sampeou, Babil, Ampil, Poy Pet, and Mongkul Borei district. There were a lot moral offences committed by married people. Some of them are base people such as militiamen with producing team members and they also committed moral offenses with 17-April women. The problem mentioned above existed in every district. We take

measure to keep track on and destroy those who opposed Angkar's lines, traitorous elements in the [leading] lines, in cooperative, and among ordinary people.

3. Situation of external enemy:

1. According to my observation, there is nothing noticeable for the external enemy. This is the same as in the report last week. But on 25 August, there was a jet flying from the west along the national road in Poy Pet district and it then flew back. On 30 August, there was another plane flying up to Kaup Tauch in Poy Pet district and it then flew back. This is the situation of external enemy.

Region 4

Report on the enemy situation

Bakprea district:

Internal and external enemy: According to observation of the movement, there were some problems such as the enemy chop 3 cowherds injured. Teacher ordered children to steal [things]. If they did not succeed in stealing [things] the teacher did not allow the children to eat. Furthermore, the enemy was soldier elements and they secretly killed cow and took away a thigh of cow.

There were some ration enemies [those who steals things to eat] and class enemies. [Their activities] include picking crops, stealing rice and so on. The class enemies did not go out to do the labor with our people. They pretended to have lung disease, heart disease, and stomachache, etc. In fact these people rested at home and waited for good chance to steal this and that.

Region 6

Report to M. 560
Situation of country defense

1. About the situation of external enemy:

Within these 20 days, from 31-7-77 to 20-8-77, there was nothing changed along our protected lines.

Although there was nothing changed, we still educate both cadres and soldiers about the highly revolutionary vigilance and spiritual and political standpoints so that they can control and keep defending the borderlines along Cambodian-Thai borders even more carefully in accordance with the party lines.

2. Situation of the internal enemy:

Within these 20 days, we continued destroying the enemy in the base and went into jungle and checked along rivers, canals and mountains.

In Peam Pruh district:

On 9-8-77, we destroy 11 enemies who came across various regions and escaped to serve traitors in Thailand.

In Leach district:

In Kunor district, it was not heard about anything noticeable about both the enemy in the base and the enemy who came across the jungle and mountains.

Measure:

Although there is nothing noticeable, we still continue destroying the alive enemies who are [considered] internally buried enemies, the enemy who come across the forest or mountains, the enemy in cooperatives, in the bases, and the enemy in various units in region 6. We have to be self-reliant.
